RE: Change in description for Introduction to Database (CIS 3100)

The Department of Mathematics & Computer Science is proposing a change in description for Introduction to Database (CIS 3100):

FROM:

This course covers the basics of building relational databases and presenting the data in a user-friendly manner. The concepts of database normalization, data validation and referential integrity issues are stressed. The course utilizes Microsoft Access to cover these concepts but what is taught can easily be ported to large database systems such as Oracle and SQL Server. Data presentation layers using forms and reports are also covered as well as the basics of the SQL query language.

TO:

This course covers the basics of building relational databases and presenting the data in a user-friendly manner. The concepts of database normalization, data validation and referential integrity issues are stressed. The course utilizes Microsoft Access to cover these concepts but what is taught can easily be ported to large database systems such as Oracle and SQL Server. Data presentation layers using forms and reports are also covered as well as the basics of the SQL query language. This course prepares students to take the Microsoft Office Specialist exam concentrating on Microsoft Access.

Rationale for Change: Course is enhanced by the inclusion of appropriate preparation for the relevant credentialing exam. This is in keeping with the University's initiative to provide our students with the recognized micro-credential certification to enhance job readiness.
